Hey, Deep-Sea Monster! I'm Gonna Eat You Up. OK?

Look! This mighty bubble shooting!

Enjoy another new type of game shooting, swallowing and sucking .....

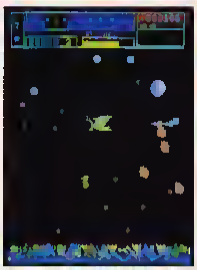
Funky Fish, while travelling underwater and approaching a deep-sea monster is going to meet attacks by a group of small enemy fish that are defending the monster. Operate the Funky Fish and let it shoot bubbles against each of these attacking fish until all of them turn into fruits. (They vary from one game to another. It's a cherry at the first round of a game. It will be a different fruit each time the game advances into a later round.) Don't miss any fish-turned-into-fruit but let Funky Fish swallow each one of them BEFORE they drop and land on the bottom of the sea. The fruit, upon reaching the seabed is geared to awaken a sleeping seashell down there. The shell would activate a sea horse to drift up for attack against the Funky Fish.

Eat up all the attacking fish-turned-fruits. Then you will find the deep-sea monster turn into a fuel station. Let Funky Fish quickly approach and overnde it for fueling to depart for an extended underwater exploration. There you will wind up conquering a round of the game. Why not continue underwater navigation with Funky Fish onto a more sophisticated round of game?

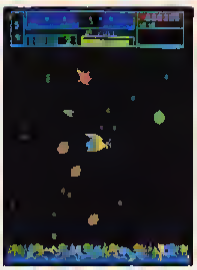
■Specification (Cocktail table)

Dimensions 860(W)x560(D)x800 – 720(H) mm
Weight 58kg (with 14" monitor)
63kg (with 20" monitor)
Power supply 100V AC 50/60 Hz
Power consumption 71W (14" monitor) 76W (20" monitor)
*Above specification subject to change without notice.

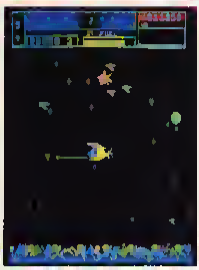
Here are tips to play the game with a greater excitement:



Shoot bubbles to transform the enemy fish into a variety of fruits



Be sure to swallow each falling fruit



Go shoot out the tongue to snatch the fish

Suck up the fuel of deep-sea monster by overriding it

Suck up the fuel of deep-sea monster by shooting the tongue to it
